JOSE FRANCISCO GALINDO EGEA

Senior Project Manager | Demand Management & Business–Technology Liaison | PMP®

Madrid, Spain • jose@josegalindo.net • https://www.linkedin.com/in/josegalindo/

EXECUTIVE PROFILE

Senior Project Manager (PMP®) and Computer Engineer with 20+ years of experience in banking, insurance, telecommunications and energy, working as the link between business areas and technology teams. Comfortable explaining technical matters to business stakeholders and translating business needs into work that engineering teams can act on.
Specialized in demand management in large, complex organizations: collecting needs from different areas, analyzing and shaping them into scoped and prioritized initiatives, and routing each one to the right solution and team. Experienced in requirements workshops, gap analysis, business cases defended before management committees, and backlog governance.
Skilled at coordinating data, development, deployment and operations teams, and external vendors and delivery factories, asking each team for what is appropriate. Able to start new projects from scratch and carry them through to go-live, owning planning, deadlines and methodology.
Experienced in mediating between business areas, aligning shared needs and keeping executives informed, including alongside data governance and regulatory data teams. Has driven technology adoption among business users and controlled IT change, and has taken over services and projects in difficult situations and stabilized them.
Technically fluent without being a hands-on engineer, with practical experience applying generative AI to a PMO reporting use case in a personal pilot prototype. Immediate availability; hybrid or remote.

KEY ACHIEVEMENTS

- **Demand into initiatives (Caixa Geral):** Led the 2009–2011 Systems Plan for informational systems, holding working sessions with user areas for requirements capture and gap analysis, consolidating multi-area demand into prioritized initiatives and defending the investment case before the Committee; over 80% of the prioritized initiatives were later incorporated into the area's execution portfolio.
- **Backlog and demand prioritization:** Achieved over 95% compliance with the delivery plan at Grupo VIPS (ALSEA) by optimizing backlog management and prioritizing corrective and evolutionary demand, and over 90% at Santander CIB through backlog optimization and structured demand management.
- **Business–technology adoption:** Drove CRM adoption above 70% among sales teams by coordinating technology and business stakeholders and managing stakeholder expectations for mid-market clients.
- **Routing demand across internal teams and factories:** Guaranteed continuity of 190,000 hours/year of demand at the Santander BMG PMO by optimizing headcount and balancing workload between internal teams and external delivery factories.
- **External vendor coordination:** Reached 92% compliance with the Product Plan on the Credit Risk Data Warehouse (82,000 hours/year) through strategic planning and capacity management across a six-factory delivery model.
- **Cross-unit alignment:** Aligned a 17-project, 150,000-hour portfolio between BBVA corporate standards and regional development at Bancomer (Mexico) through technical supervision and coordination between Business and Development units, and recovered 4–6 weeks of accumulated delay through structured replanning and cross-dependency management.
- **Change control with engineering teams:** Reduced the change failure rate (CFR) by 65% at Mapfre, from 8.6 to 3 rejections per month, by introducing a pre-validation step and a mandatory change-review window, without slowing delivery pace.

PROFESSIONAL EXPERIENCE

Senior IT Governance & Delivery Manager – Banking | Grupo Santander (Ayesa Ibermática) **09/2025–03/2026**

- Led technical delivery of integration systems and professional services for multidisciplinary teams in a Tier-1 banking environment (132,000 hours/year).
- Single point of contact for ten IT services and technical-assistance contracts in a multi-vendor environment of 75 professionals.
- Managed and controlled a €6.5M P&L, improving profitability by 6% through variance containment and rate optimization.

Senior IT Service Delivery Manager – Insurance Core | Mapfre (Ayesa Ibermática) **09/2023–08/2025**

- Led evolution and improvement services for a critical core in a multinational insurance environment, coordinating end to end the Release Management strategy of REEF Mapfre (24,000 hours/year of allocated capacity).
- Stabilized SLA compliance above 98% through Lean re-engineering of operating processes and specialized taskforces; eliminated contractual penalties through tighter operational control and proactive incident management.
- Reduced the change failure rate (CFR) by 65%, from 8.6 to 3 rejections per month, through a pre-validation step and a mandatory change-review window.

JOSE FRANCISCO GALINDO EGEA

Senior Project Manager | Demand Management & Business–Technology Liaison | PMP®

Senior IT Service Delivery Manager – Data Operations Platform | Banc Sabadell (Ayesa Ibermática / Kyndryl) **02/2021–08/2023**

- Managed operations and continuity of critical data services in an enterprise banking environment, coordinating the corporate Big Data ecosystem (18,500 hours/year) across technical teams and specialist vendors.
- Reduced critical performance and processing incidents by 80% (from 5 to fewer than 1 per month) through preventive maintenance, proactive monitoring and stronger operational governance.

IT Service Delivery Manager – Telecom & Retail | Telefónica Global Solutions (TGS) / Grupo VIPS (ALSEA) (Ibermática) **02/2020–01/2021**

- Delivered integration, middleware and high-availability provisioning platforms (10,000+ hours/year) in high-demand transactional environments under agile methodologies.
- Designed and implemented a software maintenance governance model oriented to demand prioritization and backlog optimization, aligning development capacity with the business's functional priorities (TGS).
- Governed the backlog and prioritized corrective and evolutionary demand as client single point of contact, with executive KPI reporting, for a retail loyalty-app maintenance service (Grupo VIPS/ALSEA).

IT Service Delivery Manager – International Offices eLab | Santander CIB (Ibermática) **04/2018–01/2020**

- Coordinated critical international financial services (10,500+ hours/year), keeping SLA compliance close to 90% under high concurrency through coordination of technical teams and prioritization of critical incidents.
- Re-engineered the request assessment process using Lean on the ITIL framework: response time down 33% (from 6 to 4 days) and assessment SLA up from 75% to 100%, sustained at ~95% for 18 months.
- Optimized the backlog and structured demand management to exceed 90% compliance with the delivery plan; orchestrated releases with the deployment team, stabilizing delivery cadence.

Transformation & Advisory | Independent Consulting **12/2016–03/2018**

- Digital consulting and operational management of CRM digital services for mid-market organizations (6,000 hours).
- Coordinated business and technology stakeholders to secure alignment and adoption, reaching CRM adoption above 70% among sales teams; delivered a first functional MVP in ~8 weeks through Scrum and continuous integration.

IT Program & Delivery Manager – Regulatory Delivery | Liberbank (Atmira) **05/2016–11/2016**

- Led technical delivery of the IAS 39 regulatory project for Risk Systems (5,480 hours), coordinating three technology streams: Host, Online and SOA/WebServices.

IT Program & Governance Manager – PMO & Regulatory Transformation | Grupo Santander (Atmira) **09/2013–04/2016**

- Coordinated the Santander Credit Risk DWH Plan (82,000 hours/year) across 6 factories, reaching 92% of the Product Plan.
- Coordinated the Santander Consumer RDA-BI/BCBS 239 regulatory program (58,000 hours) across 5 external factories.
- Oversaw end-to-end delivery, QA/UAT phases and production rollout, ensuring data integrity and traceability.

IT Service Management Office (SMO) Lead | Repsol (Devoteam) **09/2012–09/2013**

- Designed and implemented ITIL-based operational governance frameworks and a Service Management Office (SMO) with KPIs/SLAs and end-to-end traceability for corporate services of an energy company (6,000 hours/year); developed ITSM services (7,000 hours/year).
- Optimized the deployment cycle through progressive adoption of DevOps practices and configuration management, reducing the risk of production promotions.

Senior PMO & Delivery Manager – Enterprise Transformation | Grupo Santander (Devoteam) **01/2010–08/2012**

- Supervised structural portfolios and programs above 190,000 hours (BMG), coordinating external factories and critical multinational dependencies across Spain, UK, Germany and USA.
- Directed multi-vendor models and executive reporting for strategic alignment, capacity and budget control.

Senior Project Manager | Independent Consultant **08/2009–12/2009**

- Additional participation in digital services initiatives and innovative environments for reporting solutions (EU program).

PMO & Enterprise Program Manager | BBVA / Caixa Geral (Everis) **08/2007–07/2009**

- Designed and implemented PMO and governance models for BBVA's global corporate data systems; led PMO and delivery oversight of the Global Informational Platform (215,000 hours, 10 simultaneous projects).
- Supervised and methodologically audited a 150,000-hour sub-portfolio at BBVA Bancomer (Mexico), coordinating Business and Development units across countries.
- Defined the 3-year Systems Plan (2009–2011) for Caixa Geral's informational systems, sizing 90,000 hours of execution, capturing requirements with user areas and presenting objectives, timelines and budget to the Committee.

JOSE FRANCISCO GALINDO EGEA

Senior Project Manager | Demand Management & Business–Technology Liaison | PMP®

Project & Service Delivery Manager | GFI Informática **03/2003–07/2007**

- Managed BI projects and technical coordination of technology services in Banking, Telecom and Public Sector, including the creation of the BI Competence Center (21,000 hours in services and 12,000 hours in projects).

Additional Experience **12/1998–03/2003**

- Early technical career in IT consulting, development and Enterprise platform integration, building the technology foundation later applied to IT service management and operational coordination.

CORE COMPETENCIES

- **Demand & Stakeholder Management:** Demand Intake & Prioritization | Requirements Elicitation & Gap Analysis | Business Case Development | Backlog Governance | Stakeholder Management | Business–Technology Liaison
- **Project Setup & Delivery:** Project Initiation from Scratch | Planning, Scheduling & Budget Control | Vendor & Multi-Factory Coordination | Dependency & Risk Management | Release & Deployment Coordination | Executive Reporting
- **Change & Service Management:** IT Change Management (ITIL) | Technology Adoption | Incident & Problem Management | SLA/KPI Governance | Lean
- **Methods & Tools:** PMP® | Agile, Scrum, Kanban & Hybrid | Jira | Confluence | ServiceNow | Power BI | Salesforce CRM
- **Technology Environments (delivery oversight, not hands-on engineering):** Data Platforms (DWH, Big Data) | DevOps & CI/CD delivery environments | AWS | Generative AI applied to PMO reporting (personal pilot prototype, not a client deployment)

EDUCATION & CERTIFICATIONS

- Executive MBA (2011, EOI).
- Computer Engineering degree – Ingeniero en Informática (1998, UMU).
- **Certifications:** PMP® – Project Management Professional (PMI, 03/2026); ITIL® 4 Foundation (PeopleCert, 12/2025).
- **Languages:** Spanish (native); English B2, with experience working in international teams (UK, USA, Germany, Mexico).
